

KEVIN HERBAS

Freelance Software Engineer

With 5+ years of experience, I design scalable AWS architectures, build full-stack apps, and optimize backend processes to solve business challenges. I stay ahead of tech trends, refine architectures, and focus on understanding your goals to deliver efficient, reliable solutions through a collaborative approach.

WORK EXPERIENCE

Backend Engineer at Infopro Digital

February 2022 - Present [Remote] [Construction & Public Sector, B2B]

Responsibilities & Key accomplishments.

- Designed scalable architectures and migrated legacy systems to the cloud, improving performance and reliability.
- Led a team of 2 developers, managing deployments, CI/CD pipelines, and code reviews.
- Implemented a faster development workflow and trained international colleagues on its adoption.
- Built a user-facing search system for validating and delivering client information.

Software Developer at Ibau GmbH

November 2020 - February 2022 [Remote] [Construction & Public Sector, B2B]

Responsibilities & Key accomplishments.

- Designed and developed a crawling system to collect data from over 400 websites, now a key data source for the company.
- Improved UI for company web applications, enhancing user experience and functionality.
- Built and deployed microservices in AWS cloud environments.
- Led the crawling project, mentoring and supervising one team member to ensure smooth execution and error resolution.

Freelancer Software Developer

November 2020 - June 2022 [Madrid, Spain]

Responsibilities & Key accomplishments.

- Design and development of web applications for different clients.
- Extraction of data from different websites.
- Web application development with frameworks such as ReactJS, Vue and Astro.
